

HOW WE HELP

The Ivey offers older adults and their families a holistic approach to person-centered memory care in a convenient, single location. Our warm, home-like environment encourages families to seek support sooner and more often. The Ivey provides convenient access to physical, speech, occupational and memory therapies and innovative health screenings and treatments.

The majority of older adults prefer to “age in place” in their own homes or with family members. As a result, The Ivey allows:

- ⌘ Older adults to live at home, yet have a stimulating environment during the day that addresses their needs for socialization, community, nutrition and support with activities of daily living.
- ⌘ Skilled professionals to provide needed medical and therapeutic activities in a non-clinical, home-like environment.
- ⌘ Increased functionality, leading to greater independence, for both the client and their caregiver.
- ⌘ Caregivers to maintain their careers and other family obligations without the exhaustion associated with full-time caregiving.
- ⌘ Reliable, safe care in a guilt-free environment, day-in-day-out, as needed.
- ⌘ Hope for the caregiver with a full range of provider resources and collaboration with other service organizations exists.
